SUMMARY

Industrial Civil Engineer with 3+ years of experience in operations, analytics, and technology development. Specialized in process automation, data analysis, and software development. Experience includes building automated interfaces and dashboards in Salesforce, optimizing operational workflows, and delivering innovative digital solutions. Demonstrated expertise in cross-functional collaboration and stakeholder management. Known for analytical thinking, data-driven decision making, and building strong workplace relationships.

WORK EXPERIENCE

Machine Learning & Computer Vision Engineer Mirai Engineering | Oct 2025 - Present

- Part of the Computer Vision team, contributing to the development and deployment of ISSA (Image Segmentation Software Applications).
- Designing and implementing Data Analysis Models with Machine Learning.

Working Holiday - Australia Australia | Mar 2023 - Jun 2025

- Snowmaker, Selwyn Snow Resort (Season 2024) – Operated and optimized snowmaking systems, ensuring efficient resource use under varying weather conditions.
- Waste Water Treatment Supervisor, Selwyn Snow Resort (Season 2023) – Oversaw end-to-end wastewater treatment operations, sensor calibrations, and coordination of sludge extraction.
- Software Developer – Developed websites, data analysis tools, and automation solutions.

Regional Operations Coordinator RedSalud CCHC, Chile | Jun 2022 - Dic 2022

- Conducted comprehensive analysis of operational data and patient satisfaction surveys to enhance patient experience.
- Led cross-functional meetings to implement data-driven management systems and technical tools, optimizing staffing allocation across regional clinics.
- Designed and executed organizational chart restructuring, standardizing key roles and improving operational efficiency.

Technical Supervisor Crystal Lagoons, Chile | Sep 2019 - Dec 2021

- Oversaw 6 lagoon facilities and water treatment system operational performance.
- Engineered automated dashboards in Salesforce for failure analysis and technology optimization.
- Created and implemented dashboards for export operations time and cost control, streamlining international export logistics to minimize time and cost inefficiencies.
- Facilitated regular client meetings to review performance metrics, address concerns, and provide technical guidance to lagoon operators across multiple facilities.
- Executed OPEX analysis and technical evaluations for prospective clients.
- Worked on innovative lagoon technologies including floating lagoon systems, temperature-controlled zones, and automated electrical monitoring systems.

EDUCATION

Industrial Civil Engineering
Adolfo Ibañez University, Chile.

2014 - 2019

ADDITIONAL INFORMATION

- **Technical Skills:** Python - SQL - JavaScript - HTML/CSS - Power BI - Tableau - Microsoft Excel - Statistical Analysis - Data Mining - ETL Tools - Machine Learning - AI Tools - Salesforce - Microsoft Office Suite - Water Treatment Operations
- **Languages:** Spanish - Native, English - Proficient (C1 - IELTS)
